

Welding Mask Eyewear EYW2 WH1300

Description	Flip-Front Welding Helmet
Lens	Available in Shade 10 and 12. Size: 51x108mm
Physical Properties	The flip-front polypropylene short shell welding helmet has a straight, impact resistant and durable shell. The curved top extends well over the head for added protection. The helmet is fitted with an adjustable ratchet suspension head harness. The flip-front lens consists of a polycarbonate clear cover splatter lens and an infrared green shaded lens.
Uses	To be used in gas and arc welding operations
Standards	SABS 1400: 1993
Precautions	Shade 1.7 or shade 3 infrared spectacles should be worn under the helmet as a secondary precaution against infrared rays when lens is flipped up.
